

A Watershed

Where is water
found in
vapor form?
solid form?
liquid form?

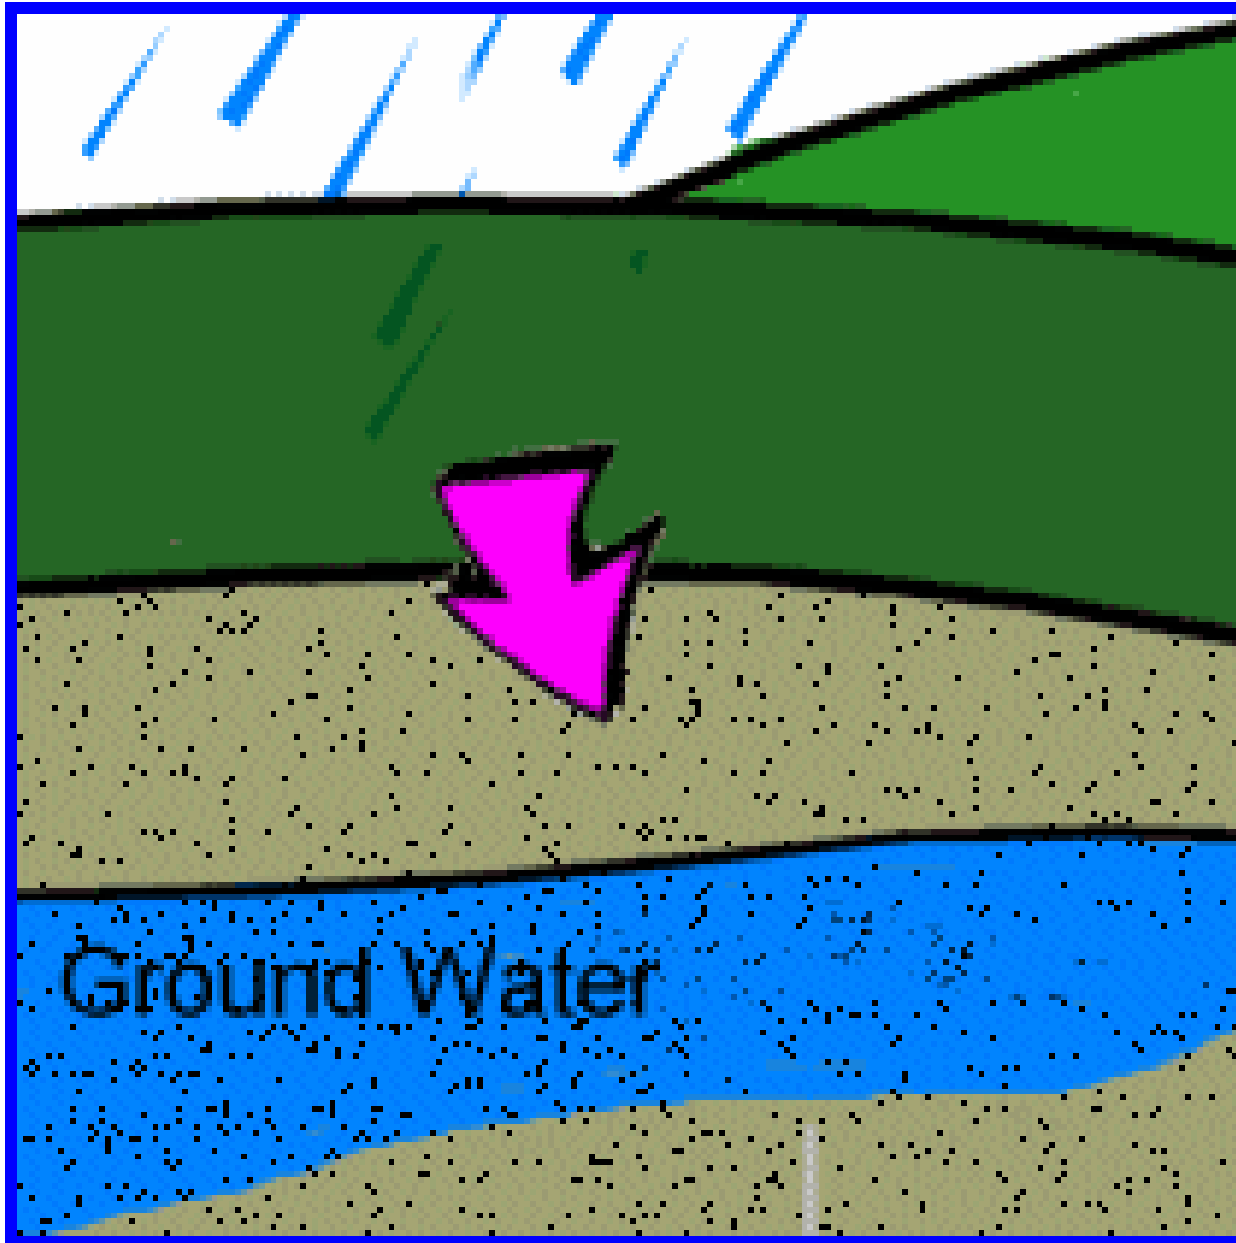

Describe the water
cycle in this
watershed to your
neighbor.

Water in a watershed flows from high to low

Water filters through different layers of soil.

The Earth
stores
water
underground
in aquifers.

Desert Watershed

Where are we on
the map?

Can you see the
rivers?

Can you tell
where the
mountains are?

What state is
this?
What rivers
are in our
watershed?

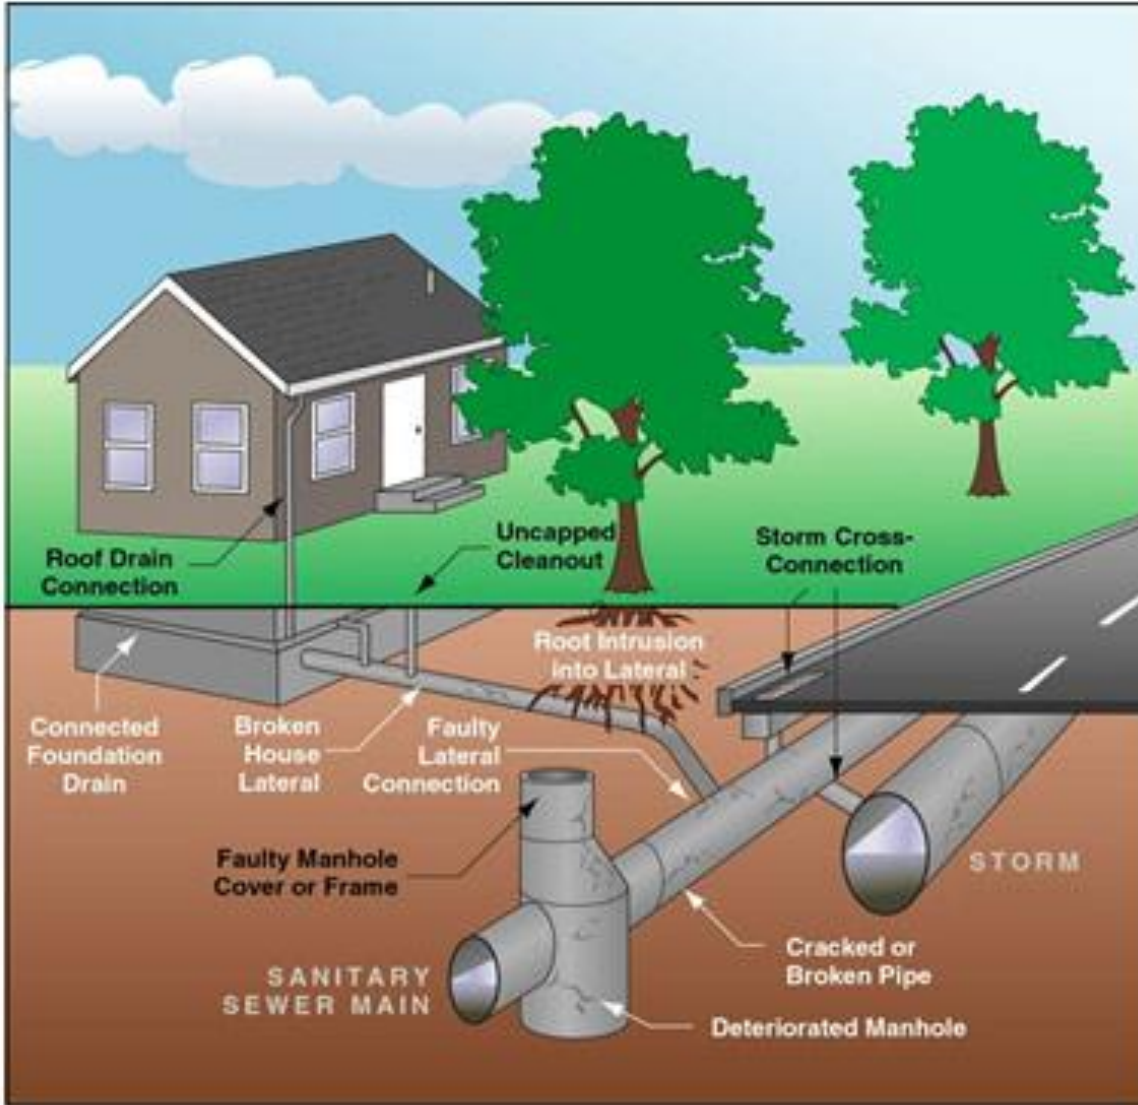

Urban Watershed

In urban areas,
pavement covers soil.

How does water get to
the soil?

What helps drain water in an urban area?

Key:

- ← Inflow Source
- ← Infiltration Source

How much does it rain in Phoenix?
